LCD Display Upgrade for System 30 Timer

HME's *DASH* uses your existing System 30 Timer to provide many of the features of the advanced digital timer system — *ZOOM* — at a fraction of the price.

No need to invest in a new system. *DASH*'s 17-inch LCD display provides a graphical picture of your entire drive-thru, so managers and crew can take immediate action to speed things up.

With easy-to-use reports, powerful comparative graphics, and remote viewing from your back office PC or the Internet, *DASH* helps you assess and manage operations more efficiently than ever.

HME's *DASH* uses your existing System 30 Drive-Thru Timer to provide many of the features of the advanced digital timer system — *ZOOM* — at a fraction of the price.

See how many cars are in the drive-thru lane and understand what's happening at a glance. Green is good, yellow means pay attention, and red means speed it up!

Graphical Dashboard Display

REAL-TIME COMPARISONS

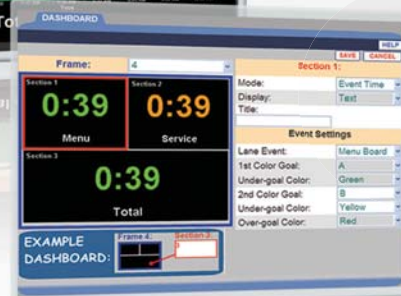

DASH's bright dashboard display presents up to eight customizable sections to compare actual service times to goals. Easily seen from anywhere and easily configured to meet your needs.

INTUITIVE COLOR DISPLAY

Vivid colors and easy-to-read graphics provide an instant picture of what's happening in your drive-thru. Once your preferences are set, real-time drive-thru management is as easy as looking at the screen. And with immediate feedback, crews stay motivated and running at peak efficiency.

Multiple events are displayed at a single glance in text or graphical formats.

DASH's intuitive, user-friendly design makes it easy to set up and configure.

Flexible Reporting

EASY-TO-USE REPORTS

Generate preconfigured or custom reports with ease. Simply choose from the large variety of ready-made reports or set your own parameters for customized reports.

POWERFUL GRAPHICS

Pie chart, bar, trend and other graphical reports provide new insight and instant feedback on drive-thru performance.

Automatically schedule daypart, shift, hourly, daily, weekly, monthly and year-to-date reports at the click of a mouse.

Graphical reports streamline information and help analyze data more efficiently.

Network Accessible

Remotely collect and compare timer data from multiple stores. Upload settings or diagnose technical issues from anywhere!

DASH is “network-ready,” enabling you to easily connect to your in-store network or back office system. View real-time drive-thru activity or access and print on-demand reports, all from the convenience of a local or remote computer.

ACCESS ANYWHERE

Access data directly from the DASH display monitor, PC or the Internet.

EASY SET-UP AND USE

With DASH’s standardized settings, you can view, adjust and upload timer settings to ensure consistent performance across multiple stores.

REMOTE SUPPORT

DASH’s network accessibility makes technical support and remote diagnostics easy. Problems can be fixed and system settings changed remotely.

DATA SECURITY

DASH’s multi-level security feature ensures that your data is protected. Multiple access levels allow you to control what information is available and user accessibility.
