TI6000™ Telephone Interface

Phone Answering from Your Headset

The days of missed calls are long gone. With the new TI6000 Telephone Interface for the digital communication system from HME, managers wearing a headset can easily answer incoming phone calls to the restaurant.

This mobile phone-answering feature enables managers to conveniently take calls from customers while supervising the drive-thru and handling other restaurant business. Calls are answered quickly, keeping customers and management happy.

The TI6000 optional feature is available for use with HME Odyssey IQ or Wireless IQ. With the touch of a button, you can have a phone conversation without disrupting drive-thru operations.

Call toll-free **(800) 848-4468** for more information today.

The TI6000 makes it more convenient to answer incoming phone calls to your restaurant while operating the drive-thru.

TI6000 Highlights:

- > **Mobile Conversations**
With the TI6000, you'll hear the phone ring in the headset. With the touch of a button, you can answer and talk on the phone without disrupting drive-thru operations. The call will be heard in full-duplex and can be muted to minimize background noise.
- > **Digital Clarity**
Because the TI6000 works with the digital communication system, both the customer and employee experience clear, secure, interference-free sound quality.
- > **Private Conversation Option**
The TI6000 allows a manager to answer the phone via the headset or use the office phone for a private conversation.
- > **Convenient Phone Communication**
Because of the digital system's multi-channel feature, the extra channel is used for telephone communication and will not disrupt drive-thru operations.
- > **No Need for Cordless Phone**
The TI6000 eliminates the need for cordless phones that are frequently misplaced or are not charged.

About HME

HME was the first to introduce the wireless headset system concept to the QSR industry. We have the most systems installed worldwide. Wireless communications for QSRs is HME's core business. Hence we are the only manufacturer that provides total solutions for your drive-thru, including wireless and cabled communications, timers, service and support.
