

## **Bethany Lutheran Village cuts labor costs and enhances residents' experience with server paging from HME Wireless**

ATLANTA, GA — January 20, 2014 — Bethany Lutheran Village, a continuous care retirement community that is part of Graceworks Lutheran Services, is now using a [server paging system](#) from HME Wireless to deliver a better dining experience to residents and operate more efficiently.

Before using [server pagers](#), Bethany kitchen staff had to ask whatever server was nearby to go get the server whose food was ready. Now as soon as an order is ready, the kitchen pages the appropriate server and food is delivered fast and fresh. **Server paging** has also helped to reduce labor costs for the restaurant.

“We used to have servers getting done at 8 pm, and now 90% of the time they’re done at 7:30 or 7:40,” said Eric Williams, Executive Chef at Bethany Lutheran Village. “We’ve been able to reduce labor by 20 minutes a night times six servers.”

Williams also noted the expanded range of the **server paging system**, saying that even though he has trouble with cell service in the restaurant he’s never had an issue with the [restaurant pagers](#).

“Our **server paging system** is an invaluable piece of equipment,” said Williams. “I would recommend it to other facilities.”

“The staff at Bethany Lutheran Village is committed to serving its residents well and HME Wireless is proud to help fulfill that mission,” said Russ Ford, Vice President of HME Wireless.
