

**Gilligan's Bar & Grill gives service and efficiency a boost  
with new server paging system from HME Wireless**

ATLANTA, GA— January 22, 2014 — Gilligan's Bar and Grill of Harrisburg, PA is now using [server pagers](#) from HME Wireless to live up to its billing as “the ultimate in casual dining.”

The new [server paging system](#) at Gilligan's was precipitated by the limited range of its older system. After doing research at other restaurants, General Manager Steve Meyers made the call to go with **ServerCall paging** from HME Wireless, which he described as “a great product with impact right out of the box.”

“Our new [server pagers](#) make the front of the house flow much better,” said Meyers. “The kitchen gets no more ‘are we up soon’ questions, and the system benefits both customers and employees.”

Located near the turnpike and in a busy hotel zone, Gilligan's Bar and Grill attracts a varied clientele of visiting tourists and loyal locals. Its menu runs the gamut from Veal and Scampi Misto to Rack of Lamb, Kobe Beef, Lobster and a variety of kids' favorites. Meeting such a wide array of tastes makes consistency and quality vital to the restaurant's success — and HME Wireless is proud to do its part with **server pagers**.

“Customers have come to expect quality food and service from Gilligan's Bar & Grill, and HME products are the perfect fit for meeting their expectations,” said Russ Ford, Vice President of HME Wireless.
