
HME Expands International Distribution of Pro Audio Products

New Distributors Introduce HME Wireless Intercom Systems to Asian and European Markets

POWAY, Calif. — July 12, 2005 — Sound professionals and other users in Asia and Europe can now conveniently purchase quality wireless intercom systems directly from three new distributors representing HM Electronics, Inc. (HME).

Representing HME in the Asian market, More Technologies, Inc. — located in the United States — distributes the digital DX200 and the award-winning PRO850 Wireless Intercom Systems to users in Japan, China, Singapore, South Korea, Malaysia, India, Taiwan and the Philippines. More Technologies, Inc. can be reached at (310) 480-8998 or www.moretec.net.

Representing HME in the European market, Orbital Sound and Apex n.v. handle the distribution of both HME systems to various countries. Orbital Sound — located in the United Kingdom — supplies HME systems to customers there. Orbital Sound can be reached at 020 7501 6868 or www.orbital-sound.co.uk. The Belgium distributor, Apex n.v., supplies the DX200 and PRO850 to Belgium, Luxembourg and the Netherlands. Apex n.v. can be reached at 011 28 61 91 or www.apex-audio.be.

“We are excited about the quality and stature of the distributors we’ve recently added,” said J. Michael Hughes, vice president and general manager of HME’s Pro Audio Division. “In addition to delivering outstanding customer service, they have proven themselves to be market leaders by successfully introducing advanced technologies like our DX200 Wireless Intercom System to the appropriate users for the right applications.”

HME’s Digital DX200 Wireless Intercom operates within the 2.4 GHz range, offers exceptionally clear, hands-free communications, and is immune to interference from systems operating in the UHF or VHF bands; no license is required. The DX200 employs frequency hopping spread spectrum with digital encryption for more secure communications. The belt-pacs are the smallest and lightest available today.

The award-winning PRO850 allows production crew members to easily communicate with their manager and each other via wireless belt-pacs — without the hassle of dragging cables around. The PRO850 is used mainly by sound professionals in theatres and television broadcast companies; but its application also spans to the military, aerospace, stadium/concert events, churches, touring companies, schools, and other industrial companies.

Founded in 1971, HME is an innovative technology company focused on enhancing productivity and customer service for the pro audio, quick service restaurant, and surveillance markets. HME's groundbreaking innovations, passion for excellence, and commitment to service have earned the distinction of being a technology leader. A technology pioneer — the first to develop the wireless headset for the drive-thru and the intercom system for the pro audio industry — HME delivers the most comprehensive and customer-focused solutions to many businesses worldwide.
