HME's DX200 Digital Wireless Intercom operates within the 2.4 GHz range, offers exceptionally clear, hands-free communications, and is immune to interference from systems operating in the UHF or VHF bands; no license is required. The DX200 employs the latest digital techniques such as frequency hopping spread spectrum with digital encryption for more secure communications. The belt-pacs are the smallest and lightest available today.

**About HME**

HME is a leading provider of customer-focused solutions to enhance the performance and productivity of businesses in a variety of markets. Incorporated in 1971, HME was a pioneer in the development of the first wireless intercom system for the pro audio industry. From communications and entertainment to security solutions, HME's wireless and digital innovations are transforming many industries, especially pro audio and quick service restaurants. With award-winning products such as the PRO850 Wireless Intercom used for high-end broadcast and professional theatres, HME develops and delivers a comprehensive line of customer-driven solutions to over 80 countries worldwide.
