

FOR IMMEDIATE RELEASE

HME Wireless Introduces SmartCall SMS Restaurant Wait-List Management System

Unique integrated restaurant wait-list management system allows customers to be contacted via text message or page

Atlanta, GA—August 30, 2011—HME Wireless has introduced SmartCall SMS, a unique cell phone paging and wait-list solution for restaurants. SmartCall [SMS restaurant wait-list management](#) system can be operated from any computer with Internet access, and there's literally nothing to install or maintain. Now managing the flow of customers is easy and affordable, no matter what size the business.

SmartCall SMS' unique integrated system allows waiting customers to be contacted via any wireless UHF pager, or on their very own cell phone or smart phone by text message. The [restaurant wait-list management](#) system leaves waiting customers free to roam and relax, knowing they'll be contacted instantly without wandering out of range. At the same time businesses gain efficiency, no longer having to search for customers when their table is ready.

"This is a simple, affordable solution for any business looking to enhance service and efficiency," said Daren Haas, VP of Marketing & New Business Development at HME. "It's a quick add-on to existing pager systems, and getting started is a snap."

SmartCall SMS [restaurant wait-list management](#) system runs from any computer with Internet access, so it's easy-to-use with no complex set-up or training required. Electronic wait-lists are easy to create, allowing businesses to manage the flow of customers with a few simple mouse clicks.

For more information on SmartCall SMS and complete on-site paging solutions from HME Wireless, call (866) 611-4202 or visit www.hmewireless.com.
