HME Moves to Poway

San Diego, CA — HM Electronics, Inc. (HME) has just relocated to a new facility in the City of Poway, at 14110 Stowe Drive. The brand-new, larger facility with 71,000 square-feet (vs. 66,000 square-feet at the previous location) is home to about 225 HME employees.

"We're very excited about the move," says Daren Haas, Director of Marketing. "Our expanded, modernized facility will enable us to provide a higher level of support to our growing customer base and product lines."

The interior of the facility has been specially designed to improve communications among various departments and promote a more productive working environment for HME's employees. HME has also added a number of new technologies to streamline operations and customer service.

"Moving to a new facility is a big step for HME. We are optimistic that with a new start, HME will be able to serve our customers better and increase our potential to grow within the next few years," says Haas.

HM Electronics, Inc. (HME) has been the leading provider of technology for the QSR industry for nearly two decades. A pioneer in technology, HME introduced the world's first patented wireless communication for the drive-thru application and designed the first wireless microphone for the Pro-Audio industry. Today, HME continues to deliver the most comprehensive line of solutions to help businesses improve their security and productivity. From communication and security systems to speed-of-service timers, HME has built a reputation on delivering customer driven solutions based on quality and reliability. Incorporated in 1971, the privately held HME develops, manufactures, markets and services its products over 60 countries worldwide.
