## System 30 Drive-Thru Timer Upgrade

# LCD Display Upgrade for System 30 Timer

More than a drive-thru timer

## No Need to Invest in a New System

HME's *DASH* links with your existing System 30 Timer to provide many of the benefits of an advanced *ZOOM* digital timer system, at a fraction of the price. *DASH*'s 17-inch graphical display allows you to see your entire drive-thru at a glance, so you can spot problem areas and take immediate action to speed things up.

## Manage More Efficiently

*DASH* puts powerful tools at your fingertips to help assess and manage operations more efficiently than ever ... easy-to-use reports, comparative graphics, and remote viewing from your back office PC or Internet.

*HME's DASH gives you the power of an advanced ZOOM digital timer at a fraction of the price.*

*See how many cars are in the drive-thru lane and understand what's happening at a glance. Green is good, yellow means pay attention, and red means speed it up!*

# Graphical Dashboard Display

A whole new way of looking at drive-thru operations

## Real-Time Comparisons

With up to eight customizable sections for comparing actual service times to goals, *DASH's* bright display makes it easy to track and improve drive-thru performance. And it's a snap to configure.

## Intuitive Color Display

*DASH's* intuitive display makes real-time drive-thru management as easy as looking at the screen. Vivid colors and easy-to-read graphics provide an instant picture of what's happening in your drive-thru. And immediate feedback keeps crews motivated and running at peak efficiency.

*Multiple events are displayed at a single glance in text or graphical formats.*

*DASH's* intuitive, user-friendly design makes it easy to set up and configure.

# Flexible Reporting

A picture is worth a thousand words

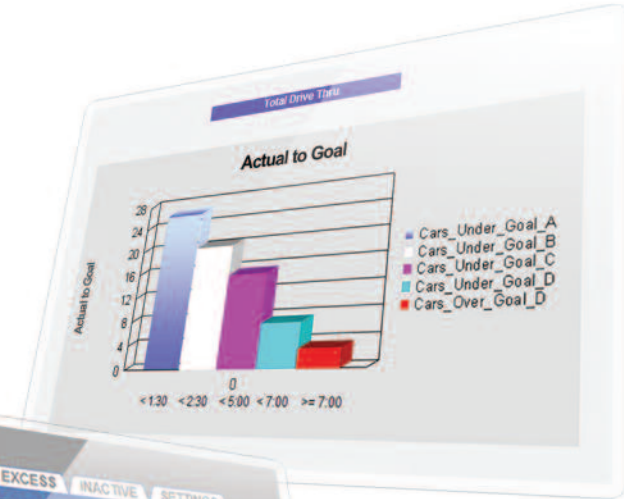

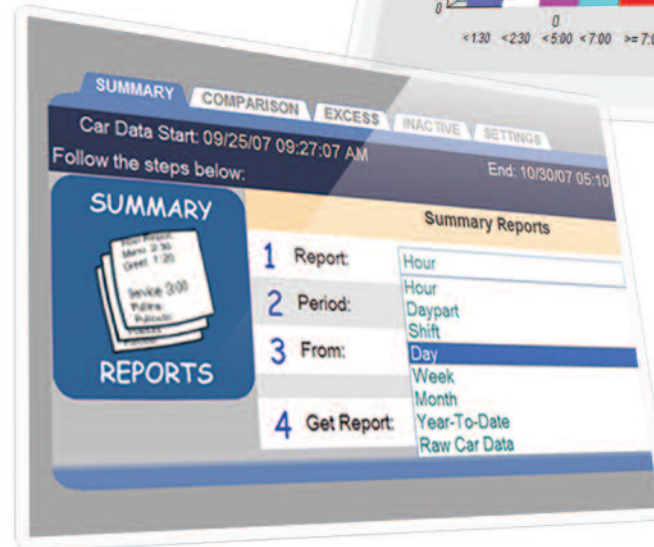

## Easy-To-Use Reports

Simply choose from the large variety of ready-made reports or set your own parameters for customized reports.

## Powerful Graphics

Pie chart, bar, trend and other graphical reports provide new insight and instant feedback on drive-thru performance.

*At the click of a mouse, automatically schedule day-part, shift, hourly, daily, weekly, monthly and year-to-date reports.*

*Graphical reports streamline information and help analyze data more efficiently.*

# Network Accessible

Information anytime, anywhere

## Access Anywhere

*DASH* is "network ready," so you can easily connect to your in-store network or back office system. View real-time drive-thru activity or access and print on-demand reports, conveniently from a local or remote computer.

## Easy Set-Up and Use

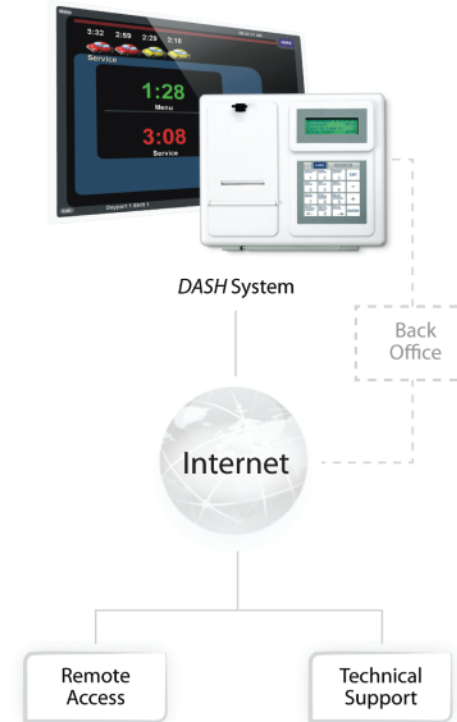

*DASH*'s standardized settings make it easy to view, adjust and upload timer settings across multiple stores, ensuring consistent performance across all locations.

## Remote Support

*DASH*'s network accessibility makes technical support and remote diagnostics simple. Problems can be fixed and system settings changed remotely, saving you time and money.

## Data Security

With multi-level security, you can be assured your data is protected. Multiple access levels let you control what information is available to what users.

*Remotely collect and compare timer data from multiple stores. Upload settings or diagnose technical issues from anywhere!*

HME pioneered the first wireless drive-thru headset system to the QSR industry and remains the leading provider of drive-thru systems worldwide. We are the only manufacturer that provides the most comprehensive and customer focused drive-thru solutions to the QSR industry. This includes wireless and cabled communication systems, speed of service timers, and worldwide service and support programs.
