

# PRO850™ WIRELESS INTERCOM SYSTEM HME BATTERY CHARGER & BATTERIES

Go the distance in wireless performance.

*Customer Driven*

## **AC850 CHARGER**

LED indicators for: Power - Red

Charging/fault - Solid Amber/Blinking Amber

Ready (charge complete) - Green

Each charging bay operates independently of other bays.

Automatically detects and will only charge BAT850 batteries.

Maximum charging time is approximately three hours for a fully discharged battery.

Each charging bay automatically terminates the charge cycle, allowing batteries to be left in the charger indefinitely without damage.

Ambient temperature range for charging needs to be between 0°C and 40°C.

Typical power consumption, with four batteries loaded, is 25 Watts.

## **POWER SUPPLY**

Universal power input of 90 - 250 VAC @ 50 - 60 Hz

UL, CSA approvals; CE mark, TUV (GS) mark, and CB report

## **BAT850 BATTERY**

Minimum of 2100 mAh capacity NiMH pack

Voltage 7.2 volts
