

20/20 Sight sees greater efficiency and improved customer satisfaction with push button paging from HME Wireless

ATLANTA, GA — January 22, 2014 — 20/20 Sight, an optometric group with three offices in the Dallas Forth-Worth area of Texas, is now using [push button paging](#) from HME Wireless to enhance efficiency and patient satisfaction.

Before [medical pagers](#), 20/20 doctors used to walk patients to the next step in their treatment process. Now when a 20/20 Sight doctor is finished with a patient, all he or she does is push a button to signal a technician or optician that the patient is ready for them.

“Our reviews online have been a lot better as far as waiting time,” said 20/20 president, Dr. Larry Tarrant. “We’ve had patients many times comment on how nice it is to have the better level of service. Sometimes they’ll even ask if we have a ‘magic button’ to let our staff know when to come.”

According to Dr. Tarrant, 20/20 Sight chose HME Wireless for [healthcare paging](#) because it was the simplest, most cost-effective solution. So far he and his colleagues are thrilled with the results. In fact, Dr. Tarrant said he would “definitely” recommend HME Wireless **push button pagers** to similar businesses.

“HME Wireless is proud to help 20/20 Sight in its growth and success,” said Russ Ford, Vice President of HME Wireless. “We’re always looking for new markets to serve, and optometrist offices are a great fit with our technology and innovation.”
