APCO 2015, BOOTH 1843

CLEAR-COM SHOWCASES NEW DISPATCH AND RADIO GATEWAY SOLUTIONS

- Cost-effective dispatch solutions for fixed or mobile applications -

ALAMEDA, USA – AUGUST 10, 2015 — At the upcoming 81st annual Association of Public Safety Communications Officials (APCO) Conference and Expo in Washington D.C., [Clear-Com](#)[®], the leader in real-time communication and connectivity solutions, will showcase the new Clear-Com Dispatch and Clear-Com Gateway interoperability solutions, offering superior audio quality in a fully featured, cost effective platform that will change the way public safety communication is handled.

The Clear-Com Dispatch System is a scalable and flexible platform featuring four to 64 channels, tone keying, VOIP and ROIP. Providing both local and distributed system architectures, the space-saving 1RU (Rack-Unit) configurations offer up to 16 ports for radio and IP interfacing. Additionally, each Dispatch System delivers full-featured intercom, radio, telephone, and dispatch capabilities—all in one unit, as well as exhibits high sound quality. The Clear-Com Dispatch system integrates with the company's Eclipse HX digital matrix intercom platform and the Clear-Com Gateway platform for expanding user's communication requirements.

Clear-Com Gateway is the ideal interoperability solution for immediate on-site communication across different frequencies for government, military, public safety agencies and many other applications.

“We’re excited to see the popularity of the new Clear-Com Gateway platform devices increase across the public safety market,” said John Kruman, Regional Sales Manager for Central USA at Clear-Com. “The features are easy to use and allow immediate, reliable and cost-effective communication across disparate communications systems, ensuring critical information can be shared.”

CLEAR-COM SHOWCASES NEW DISPATCH AND RADIO GATEWAY SOLUTIONS

Clear-Com Gateway combines advanced radio interface technology for analog and digital radios with a suite of programmable features to meet the most demanding radio and Land Mobile Radio (LMR) applications. Gateway bridges radio channels across different radio platforms, port-to-port, port-to-multi-port and Radio-over-IP (RoIP), which enables cross-communication between different frequencies. In addition, as the radio market continues to move to Digital Radios and 4G LTE, Gateway devices can link to these digital radio networks via SIP and the Digital Radio Module which allow analog-to-digital and digital-to-digital bridging and conferencing on one platform.

Clear-Com Gateway devices also have built-in SIP interface capability. Standards-based IP interfacing for Voice-over-IP (VoIP), Radio-over-IP (RoIP), Unicast, Multicast and SIP applications are supported for connectivity and interoperability. When connected to Clear-Com intercom systems, the 4-wire port signaling capability can activate features and trigger radios and SIP telephone access becomes available within Clear-Com systems.

The CG-X1 is the 2-port option for remote sites and single-channel bridging. The CG-X4 carries a higher port density of 8 ports in a small form factor, with the possibility of up to 16 ports in total in a 1RU space.

Clear-Com's line of new and enhanced products will be available for demonstration at APCO 2015 on Booth 1843 at the Walter E. Washington Convention Center, including the popular FreeSpeak II digital wireless intercom system, and the successful HelixNet partyline intercom system.

About Clear-Com®

For over 40 years, Clear-Com has provided professional communications solutions for command & control, training & simulation, and net-centric communications. Clear-Com's partyline, digital matrix, wireless systems, fiber transport and intercom-over-IP conferencing solutions have led the industry with high quality audio performance that meets critical needs in a variety of federal and municipal government operations. Clear-Com continues to be the preferred choice for clear, reliable, and scalable communication solutions for local government operations such as City of Chicago EMS, Illinois State Police and the Houston Metro to federal government operations such as U.S. Disaster Relief Corp, U.S. Customs & Border Protection, NASA, and many more.
