

Buff Brothers uses server paging from HME Wireless to bring fresh food and great service to its neighborhood concept

ATLANTA, GA — January 27, 2014 — Buff Brothers of Parker, CO and Scottsdale, AZ is now using [server pagers](#) from HME Wireless to deliver its signature dishes hot, fast and fresh. Buff Brothers’ unique concept lets each one of its sports bars take on the unique characteristics of the neighborhood in which it is located.

Prior to the [server paging system](#), Buff Brothers used numbered lights that were flipped on when a certain bartender or server’s order was ready. According to district manager Andrew Malkoski, that system didn’t work out too well.

“The bartender or server had to remember to look for those lights,” said Malkoski. “As opposed to a server pager that just sits in their pocket and notifies them immediately.”

While Buff Brothers lets each location be defined by its neighborhood, the restaurant is known for serving the same delicious wings and green chili recipe for 14 years. With [server pagers](#) from HME Wireless, the popular destination ensures that its level of service and food quality remains high.

Malkoski said that he would definitely recommend server paging to other establishments, saying “I don’t know of any better way to do it.”

“Buff Brothers prides itself on ‘Good food. Good drinks. Great people,’ and HME is proud to help them live up to that motto,” said Russ Ford, Vice President of HME Wireless.
