

Theater paging system and two-way radios from HME Wireless are a hit with Cinergy Cinemas' staff, customers

ATLANTA, GA — January 29, 2014 — Cinergy Cinemas, headquartered in Dallas, TX, is using [theater pagers](#) and [two-way radios](#) from HME Wireless to enhance customer service and staff communication.

“We opened with [guest pagers](#) for the theater and very few [two-way radios](#),” said Joey Zapoli, director of operations at Cinergy Cinemas. “We found that by adding more radios we could communicate better and are more efficient when running between theaters and the game floor.”

Cinergy Cinemas uses **theater pagers** to notify customers when to come down to the counter and pick up their food. **Two-way radios** enhance staff communication across the many rooms and levels of the complex.

According to Zapoli, Cinergy chose HME Wireless for its “pricing, dependability and customer service.” He added that the **theater pagers** and **two-way radios** and working out “very well” for the organization.

“Any establishment that has so many different rooms, so many different levels, I think it’s more efficient to use them,” stated Zapoli when asked if he would recommend the pagers to other establishments.

Cinergy Cinemas combines the concept of a casual eatery with a family entertainment center and movie theater. Here, patrons are just as likely to grab a beer and burger with their movie, as they are to play a game in the arcade.

“Cinergy Cinemas has a very unique and successful concept,” said Russ Ford, Vice President of HME Wireless. “We’re proud to play a role in that success.”
