

FOR IMMEDIATE RELEASE**High school coaching legend Max Miller finds gridiron success once again, thanks to DX300 football coaching headsets from HME**

“Clinic of Champions” founder cites clarity, ease of use and lightness as winning features of DX300

SAN DIEGO, CA—November 17, 2011—National High School Hall of Fame member, Max Miller is using the DX300 football coach headset system from HM Electronics, Inc. (HME) in

pursuit of another state championship for the Folsom Bulldogs. Miller came out of retirement two years ago to join Folsom (of Sacramento, CA) as an assistant coach. He brings more than 45 years of experience and the most wins ever in the San Joaquin section as a head coach.

“HME’s football coach headsets are extremely valuable to the success of our program,” said Miller. “They’re so lightweight and easy to handle, everyone’s amazed. And the clarity is outstanding.”

Miller is the founder of “Clinic of Champions”, the longest running football coaching clinic on the west coast. According to Miller, Folsom uses the football coach headset system more than most schools — both in preparation and during games. He cited the efficiency of setup, consistency of sound volume, and reliability of the battery as key strengths of the DX300.

Miller was quick to tout effectiveness of the DX300 on his and other football programs’ success.

“This system is outstanding,” he said. “I’d recommend it to anybody.”

For more information on DX300 football coaches headsets, call (800) 909-6604 or visit www.hme.com/DX300.
