

CLEAR-COM SHIPS NEW LQ SERIES

- New product family underlines Clear-Com's continuing leadership in linking technology for connecting audio and communications systems over IP networks -

ALAMEDA, USA – 8 December 2014 – Clear-Com® announced today that it is now shipping the LQ series, a new family of connectivity devices for linking intercom and audio systems over LAN, WAN or IP networks. Based on Clear-Com's patented I.V.-Core technology, LQ (formerly known as LINQ) provides the industry with the next step in intercom/audio linking technology.

As part of building a communications link, LQ utilizes the low latency audio CODEC OPUS, which features a range of different settings to provide high quality audio on the network bandwidth available. This means that the LQ Series can be used for intercom conversation, networked music performances and for audio signals that need to be transported between different facilities. The compact LQ throw-down devices enable connections of 2-wire partyline with call signaling and 4-wire audio over LAN, WAN or Internet IP infrastructures. The LQ Series has a 2-wire (LQ-2W2) or 4-wire (LQ-4W2) option. The LQ-2W2 is both Clear-Com and RTS TW compatible. A maximum of six LQ IP interfaces can be linked together in any 2- or 4-wire combination.

Stephen Sandford, Product Manager, Clear-Com, said, "Since its introduction at IBC 2014 the LQ series has generated a great deal of interest from users that want to expand their remote communications quickly and easily. Clear-Com's long-standing development of IP-based solutions gives our users the advantage of tried and trusted technology in this important area."

About Clear-Com®

Clear-Com, an HME company, is a trusted global provider of professional real-time communications solutions and services since 1968. We innovate market proven technologies that link people together through wired and wireless systems.

(more)

Clear-Com was first to market portable wired and wireless intercom systems for live performances. Since then, our history of technological advancements and innovations has delivered significant improvements to the way people collaborate in professional settings where real-time communication matters. For the markets we serve -- broadcast, live performance, live events, sports, military, aerospace and government-- our communication products have consistently met the demands for high quality audio, reliability, scalability and low latency, while addressing communication requirements of varying size and complexity. Our reputation in the industry is not only based on our product achievements, but also on our consistent level of customer engagement and dedication to delivering the right solutions for specialized applications, with the expertise to make it work. Around the globe and across markets, Clear-Com's innovations and solutions have received numerous awards and recognitions for ingenuity and impact to customers.
