

Gaido's seafood restaurant carries on 100+ year tradition of service and quality with restaurant paging system from HME Wireless

ATLANTA, GA — January 2, 2014 — Gaido's seafood restaurant of Galveston, TX, is now using a [restaurant paging system](#) from HME Wireless to honor its century-old commitment to great service and fresh seafood.

“Knowing our longstanding reputation, our customers come in with an expectation of quality,” said David Rodriguez, Director of Purchasing at Gaido's. “The pagers have helped us get organized, keep track of waiting customers and take care of them as fast as possible.”

Rodriguez noted that the popular restaurant will sometimes feed up to 1,000 customers a day, if not in a lunch. HME [pagers for restaurants](#) are helping to ensure that customers enjoy their stay and come back for more.

“Gaido's is a coastal institution in Texas, and HME Wireless is proud to help carry on their 100-year reputation for quality and service,” said Russ Ford, Vice President of HME Wireless.

S.G. Gaido founded his namesake restaurant in 1911 with an unwavering commitment to serving only the very best. Today, the restaurant still peels its Gulf shrimp, shucks its Galveston bay oysters and fillets its fresh fish by hand, the way S.G. did more than 100 years ago.
