**Grub Steak Restaurant calls on server paging system from HME Wireless
to enhance efficiency and service to guests**

SAN DIEGO, CA — January 10, 2014 — Famed Park City, UT steakhouse Grub Steak Restaurant is now using server paging from HME Wireless to build on its longstanding reputation for exceptional food and service.

Grub Steak House manager Chris Haymond chose HME Wireless server pagers after researching paging systems and concluding that HME delivered the best value and highest level of service to its guests. Now when orders are ready from the kitchen, servers are paged immediately and food is delivered fast and hot.

"It's fantastic and it's made everything easy for the front and back of the house," said Haymond. "What a great addition to our restaurant."

Located in the renowned ski destination of Park City since 1976, Grub attracts a varied clientele from around the world, many of whom return year after year for its signature slow roasted prime rib, steaks and seafood.

"Grub Steak Restaurant has built a reputation for fine food and great service and HME Wireless is proud to help carry on that tradition," said Russ Ford, Vice President of HME Wireless.
