

Clear-Com at the World Cup 2014

Clear-Com® is being used in all of the World Cup stadiums. These systems are interconnected via IVC-32 and VoICE units.

Tempest® is being used for the Opening Ceremonies at the Arena Corinthians, Sao Paulo.

In addition, TV Globo's OB truck HD1 is fitted with an extensive amount of Clear-Com product and will be transmitting the games from the Arena Corinthians.

Clients using Clear-Com equipment include:

- TV Globo Rio - RJ
- TV Globo São Paulo - SP
- TV Globo Brasilia - DF
- TV Globo Minas Gerais - MG
- TV Globo Recife - PB
- ESPN Brasil - SP
- Camera 2 - RJ
- TV Bahia - BA
- TV Amazonas - AM
- Radio Itatiaia - MG
- RBS TV - RS
- TV Centro América - MT
- TV Cabugi - RN

- TV RPC - PR
- TV Anhanguera - GO
- TV Gazeta do Espirito Santo - ES

TV Globo Rio's complement of Clear-Com includes 4x Eclipse® Omega systems interconnected by E-FIB, together with an Eclipse Median at the IBC, interconnected to TV Globo through an E-QUE E1 trunk line.

Each matrix system has IVC-32 to connect with V-series panels around Brazil, together with circa 60 VoICE units for interconnecting additional sites.
