

**FOR IMMEDIATE RELEASE****King Valley Golf Club Restaurant Maintains Elegant Atmosphere with HME Wireless Server Paging**

**ATLANTA, GA — June 11, 2014** — King Valley Golf Club, a premier membership golf links club located in King City, Ontario, Canada, is using [restaurant server paging](#) from HME Wireless to maintain an atmosphere of elegance and quality in its formal dining restaurant.

The restaurant, which serves breakfast, lunch and dinner, has used [server pagers](#) for years to improve the dining experience for members and guests. When their old system experienced ongoing problems, management upgraded to HME Wireless pagers.

“HME server paging is more reliable than our old system,” says Assistant Food and Beverage Manager Natalie Di Giovanni. “The pagers work better and the batteries last longer.”

With HME **server paging**, kitchen staff can let food servers know when their orders are ready. This speeds up service to diners and ensures that all meals arrive at the table fresh and hot. It also saves on the expense of employing a designated food runner to help serve the meals.

“Having to yell ‘pick up!’ from the kitchen into the dining room doesn’t fit with the elegant atmosphere we strive to create,” adds Di Giovanni. “The HME [server pagers](#) allow us to quietly notify food servers when their meals are ready to be served. I would definitely recommend HME pagers to other restaurants.”
