CLEAR-COM PRESENTS IP CONNECTIVITY AND DIGITAL PARTYLINE INTERCOM SYSTEM AT CABSAT 2015

ALAMEDA, USA – March 9, 2015 — At CABSAT 2015 [Clear-Com](#)[®] will showcase the LQ Series, its new line of IP interface devices for linking intercom and audio over IP networks, for the first time in the MEA region. The company will also present the HelixNet Digital Partyline Intercom System, the industry's first digital network partyline intercom system. CABSAT takes place at the Dubai World Trade Centre, Dubai, from March 10-12, 2015.

The **LQ™ Series** is a new family of Intercom Connectivity (ICON) devices to extend existing intercom systems to remote locations or link multiple intercom or audio devices together across long distances, over secure IP networks (LAN, WAN, Internet). LQ devices come in a 2-wire (LQ-2W2) or 4-wire (LQ-4W2) option. The LQ-2W2 can connect partylines from any brand's intercom box for an intercom circuit over IP. It is similar to a mini partyline main station with IP connectivity. The LQ-4W2 connects and routes audio between analog ports of any matrix intercom system, analog telephone circuits, two-way radio gateways and audio consoles. A maximum of six LQ Series devices can be linked together in any 2- or 4-wire combination.

Clear-Com will also present the **HelixNet™ Partyline Intercom System**, the industry's first flexible, scalable and intelligent digital network partyline system for dynamic group communication. HelixNet comprises a Main Station and user devices including a Remote Station, a Speaker Station and Beltpacks that can be combined for flexible requirements. The HelixNet devices can be powered by Powerline modem, Power-over-Ethernet (PoE),* or a Universal AC wall adapter. By using a combination of power sources, up to 60 user devices can effectively be on the system simultaneously. Multiple systems may also be linked together over a fiber or Ethernet connection to support an even greater number of users.

These and other Clear-Com products will be available for demonstration at CABSAT 2015 in Hall 2 Stand A2-30.
