

**CABSAT 2015, HALL 2 STAND A2-30**

**CLEAR-COM TO DEMONSTRATE SUPERIOR CAPABILITIES  
OF FREESPEAK II WIRELESS INTERCOM SOLUTION AT  
CABSAT 2015**

**ALAMEDA, USA – MARCH 9, 2015** — [Clear-Com](#)® will bring its latest digital wireless intercom system, **FreeSpeak II™ wireless intercom system** to CABSAT 2015, Hall 2 Stand A2-30, taking place at the Dubai World Trade Centre from March 10-12, 2015.

FreeSpeak II, which will have its debut in Middle East region, has already proven to be an exceptional wireless intercom system for large scale deployments. FreeSpeak II operates in multiple license-free DECT bands from 1.897-1.933GHz. It succeeds the CellCom system in North America, which will continue to be offered for servicing and supporting existing CellCom system users.

The FreeSpeak II system delivers many improvements over CellCom. The all-new five-channel digital beltpack has an ergonomic form factor, intuitive operation and a rugged housing that is IP-65 rated for water and dust resistance. The beltpack features internal antennas, “Listen Again” audio memory replay, technician’s flash light on the underside, and real-time battery monitoring. The battery has been logged with an 18 hour continuous talk time. Beltpack users enjoy superior digital ‘Clear-Com Sound’ for clear intelligibility and ultimate audio comfort. Pairing the new beltpacks with the new distributed Active Antennas allows users to simultaneously roam across an expansive area while maintaining reliable wireless connections.

“FreeSpeak II is the wireless system that intercom users have been waiting for, whether in theatre, television, or any location where seamless mobility and high audio performance is essential,” said Simon Browne, Clear-Com’s Director of product management. “What makes FreeSpeak II stand out is not just its ability to intelligently integrate with digital intercom systems, but also the combination of digital audio clarity, innovative features, and reliable wireless connection. FreeSpeak II has made its way to the 2015 Oscars, on the War of the Worlds Tour and on the Jimmy

Kimmel Live Show, and proven to be a much more superior DECT wireless intercom system. Users forget that they are even on a wireless system.”

FreeSpeak II can be implemented as a standalone base station wireless system or as an integrated wireless solution within Eclipse HX matrices, known as FreeSpeak II Integra. When using the base station, up to 20 full-duplex wireless beltacks can be connected; in an integrated matrix setup, as many as 50 (or 25 in North America) full-duplex wireless beltacks can be used at the same time by strategically placing 10 or more distributed remote antennas to create an expansive coverage zone. These beltack users are then able to directly communicate with any other remote or local matrix panel or other wireless or wired beltack user who is on the Eclipse HX Matrix System network.

The FreeSpeak II family of products, together with a wide range of other Clear-Com solutions, will be available for demonstration in Hall 2 on Stand A2-30 at CABSAT 2015.

#### **About Clear-Com<sup>®</sup>**

Clear-Com, an HME company, is a trusted global provider of professional real-time communications solutions and services since 1968. We innovate market proven technologies that link people together through wired and wireless systems.

Clear-Com was first to market portable wired and wireless intercom systems for live performances. Since then, our history of technological advancements and innovations has delivered significant improvements to the way people collaborate in professional settings where real-time communication matters. For the markets we serve -- broadcast, live performance, live events, sports, military, aerospace and government-- our communication products have consistently met the demands for high quality audio, reliability, scalability and low latency, while addressing communication requirements of varying size and complexity. Our reputation in the industry is not only based on our product achievements, but also on our consistent level of customer engagement and dedication to delivering the right solutions for specialized applications, with the expertise to make it work. Around the globe and across markets, Clear-Com's innovations and solutions have received numerous awards and recognitions for ingenuity and impact to customers.
