CLEAR-COM BRINGS NEW PROGRID AUDIO DISTRIBUTION SYSTEM TO 2014 TEXAS EMERGENCY MANAGEMENT CONFERENCE

- New fiber-based infrastructure devices enable users to distribute audio, intercom, video and data signals on the same network -

ALAMEDA, CA, MAY 12, 2014 — At this year's 2014 Texas Emergency Management Conference, **Clear-Com®** will present ProGrid™, the fiber-based infrastructure system that enables users to transport and distribute audio, intercom, video and control data. The new products enable Clear-Com to provide end-to-end solutions for many types of installations that require signal distribution.

ProGrid is based on the open AES3 and AES10 (MADI) standards, providing fiber-based transport, routing and format conversion as well as distribution of audio, intercom, video and control data with full management and diagnostic capabilities over the Optocore® and SANE platform. A versatile, modular approach enables users to match the demands of a specific system need and budget, and to manage future expansion. The system is also quick to set up and break down.

Clear-Com also offers the BroaMan MUX-22 video distribution device, which further broadens the company's capabilities to provide scalable, protocol independent transport of up to eight 3G/HD/SD-SDI video signals in each device. The MUX-22 can operate with the ProGrid systems or as a standalone solution.

Simon Browne, Head of Product Management, Clear-Com, said, "ProGrid enables us to be a one-stop, full-system solution company. Not only are we able to offer our world-class communication systems, but we also now able to couple this offering with a reliable and robust distribution infrastructure for any kind of fiber-based operation that require signal distribution."

(more)

ProGrid will be available for demonstration on Booth 512.

Clear-Com's MAG specialist partner, RSI Global Communications (RSI), a globally recognized services provider, manufacturer representative, and systems integrator to government agencies and other industries will also be on the booth providing information on Clear-Com's full range of advanced intercom solutions.

About Clear-Com®

Clear-Com delivers professional communication solutions for command and control, training and simulation, test and evaluation, and more. For over 43 years, Clear-Com's partyline, digital matrix, wireless systems, and intercom-over-IP conferencing solutions have led the industry with high quality audio performance that meets critical needs in a variety of settings. Clear-Com continues to be the preferred choice for clear, reliable, and scalable communication solutions. For more information, please visit www.clearcom.com/markets/MAG.
