CLEAR-COM PRESENTS CONNECTIVITY AND WIRELESS COMMUNICATION SOLUTIONS AT BROADCASTASIA 2015

- Wireless and connectivity products bring the complete solution to production environments -

ALAMEDA, USA – MAY 27, 2015 – Clear-Com® will present its latest communication and connectivity tools at BroadcastAsia 2015. These products demonstrate Clear-Com's pedigree as a full system solution company, able to offer not only robust and reliable communications systems but also the glue that binds entire networks together.

The **FreeSpeak II 1.9GHz roaming wireless solution** has already proven to be an exceptional wireless intercom system for large scale productions. It supports up to five separate channels per wireless beltpack, providing more expansive roaming coverage using multiple antennas. When combined with the unrivalled flexibility of the Eclipse-HX Digital Matrix Frame, the result is a wireless intercom system with connections to well over 16 partylines and the flexibility to seamlessly cover difficult buildings and remote zones – fulfilling the intercom needs of any broadcaster or event planner.

Agent-IC is a new mobile app that enables users of Eclipse-HX Matrix intercom systems to remote access from an iPhone or iPad over 3G, 4G or Wi-Fi / IP networks. The app provides a simple but highly effective intercom panel to connect studio staff and OB teams in remote locations, or crew spread across wide areas for live events, using their portable handheld devices. It is a virtual intercom panel that fits in the pocket and connects users from virtually anywhere in the world. The Agent-IC app is both cost effective and easy to deploy, providing global access to a host Eclipse-HX matrix intercom system.

ProGrid™ is a fiber-based infrastructure system that enables users to transport and distribute audio, intercom, video and control data. Based on the open AES3 and AES10 (MADI) standards, ProGrid provides fiber-based transport, routing and format conversion as well as distribution of audio, intercom, video and control data with full management and

diagnostic capabilities over the Optocore® and SANE platform. A versatile, modular approach enables users to match the demands of a specific system need and budget, and to manage future expansion. The system is also quick to set up and break down.

The LQ Series is a family of connectivity devices for linking intercom and audio systems over LAN, WAN or IP networks. The LQ Series can be used for intercom conversation, networked music performances and for audio signals that need to be transported between different facilities. The compact LQ throw-down devices enable connections of 2-wire partyline with call signalling and 4-wire audio over LAN, WAN or Internet IP infrastructures. The LQ Series has a 2-wire (LQ-2W2) or 4-wire (LQ-4W2) option.

“We’re pleased to bring our latest Clear-Com wireless and connectivity products to BroadcastAsia this year, as well as our extensive range of products,” said Ann Williams, Director of Sales, Asia Pacific at Clear-Com. “Our cost-effective and robust solutions, whether wired or wireless, are built for many installations that are in need of reliable, flexible, and efficient communications.”

###

About Clear-Com®

Clear-Com, an HME company, is a trusted global provider of professional real-time communications solutions and services since 1968. We innovate market proven technologies that link people together through wired and wireless systems.

Clear-Com was first to market portable wired and wireless intercom systems for live performances. Since then, our history of technological advancements and innovations has delivered significant improvements to the way people collaborate in professional settings where real-time communication matters. For the markets we serve -- broadcast, live performance, live events, sports, military, aerospace and government-- our communication products have consistently met the demands for high quality audio, reliability, scalability and low latency, while addressing communication requirements of varying size and complexity. Our reputation in the industry is not only based on our product achievements, but also on our consistent level of customer engagement and dedication to delivering the right solutions for specialized applications, with the expertise to make it work. Around the globe and across markets, Clear-Com’s innovations and solutions have received numerous awards and recognitions for ingenuity and impact to customers.
