

## **Nola's Restaurant of Clinton, NY adds restaurant paging system to speed service and enhance customer experience**

ATLANTA, GA — December 16, 2013 — A [restaurant paging system](#) from HME Wireless is now on the menu for Nola's Restaurant in historic Clinton, NY. Owners Leah and Janssen Fay are using HME [guest pagers](#) to reduce customer wait times at the front of the house, and HME [server pagers](#) to guarantee that food is delivered hot and fast.

“The [pagers for restaurants](#) are very easy to use,” said owner Leah Fay. “They’ve allowed us to get a better handle on wait times and deliver a better experience for our guests.”

Leah and Janssen initially met while working as a chef and server at a local fine dining restaurant. After marriage and children, they decided to pursue their dream of owning a restaurant, and Nola's was born in 2005 — named in honor of the couple's three children, Nicholas, Olivia and Ella.

After five years of hard work growing the business and building a loyal clientele, Leah and Janssen decided to expand the restaurant by knocking down a 200-year-old brick wall that was previously part of Park Row Booksellers.

“We feel honored to call this beautiful and historic space home,” said Leah. “We try to make every diner's experience special, and our building and our [pagers for restaurants](#) play an important role in that.”

The restaurant prides itself on using the freshest, highest quality ingredients, often from local farms. In addition to fresh ingredients and mouth-watering cuisine, **pagers for restaurants** have been a critical part of Nola's success.
