

Busy recycling center North Lincoln Sanitary Service breaks new ground with push button paging system from HME Wireless

ATLANTA, GA — *March 25, 2014* — North Lincoln Sanitary Service of Lincoln City, OR, is now using [push button pagers](#) from HME Wireless to operate more efficiently and keep customers satisfied.

As a recycling center that's open to the public, customers come to North Lincoln's open yard to drop off various items. The busy attendant doesn't always see when a customer arrives. With [push button paging](#), customers simply push a button to request help, and the pager vibrates in the attendant's pocket.

"Customers used to arrive and stand around, wondering what to do," said Lonnie French, owner of North Lincoln Sanitary Service. "Now with the paging system, the attendant knows as soon as a customer needs attention — it works great."

In considering a push button paging system, French noted that HME Wireless had a system to meet his needs at a very competitive price. He was particularly happy that he only had to purchase one of each unit, as opposed to many units.

When asked if he would recommend HME Wireless **push button pagers** to similar establishments, French replied with an emphatic, "Yes."

"North Lincoln Sanitary Service represents a relatively new market for HME Wireless, and we're proud to help keep their customers satisfied," said Russ Ford, Vice President of HME Wireless.
