

HME EQUIPMENT INCIDENT PLAN™ (EIP)

Accidents happen. Protect your HME equipment.

Even after taking the proper precautions and training your employees well, headsets still end up in the fryer. And in the dishwasher. Keep your peace of mind knowing that the HME Equipment Incident Plan covers your equipment if it sustains accidental damage.

An EIP offers coverage for new HME headsets, belt-pacs, and battery chargers from incidents not normally covered under warranty. Exchange any combination of headsets, belt-pacs, and battery chargers with up to four replacements.

The EIP service plan covers incidents like:

- Dropped headset into fryer or grill
- Dropped headset onto drive-thru path, leading to damage by car
- Dropped belt-pac into dishwasher
- Connecting the wrong power adapter and burning the battery charger

An EIP protects new HME headsets, belt-pacs, and battery chargers from incidents that occur within two years from the original purchase date of a new system. Plus, we'll replace headsets within two business days and battery chargers by next day shipping so that you can easily and quickly get back to business.

Purchase an EIP with your new HME headset system to immediately protect your investment from any accidental damage.
