

THE ESSENTIALS FOR DRIVE-THRU COMMUNICATION

Elevate the Classic Drive-Thru Experience

For restaurants running a basic drive-thru operation and wanting to deliver a customer experience that's worth coming back to again and again, NEXEO Core is for you. NEXEO Core provides unmatched audio quality, remote system management, and enhances system usability to improve your crew's day-to-day experience. Take your drive-thru operation to the next level with NEXEO Core and deliver a fast and excellent experience to every customer, every time.

Superior Audio, Higher Order Accuracy

NEXEO Core enables a fully digital drive-thru experience with HDX Digital Audio for faster service and higher order accuracy. Our patented technology dramatically reduces background noise and expands audio bandwidth, resulting in a perfectly clear drive-thru ordering experience both for order takers and customers alike.

NEXEO Highlights:

- ✓ HDX Digital Audio
- ✓ Touchscreen Interface
- ✓ Intuitive Message Center
- ✓ Tap-to-Connect Registration
- ✓ At-a-Glance System Health
- ✓ Remote Management & Troubleshooting

System Information at Your Fingertips

Unlike other communication systems on the market, the NEXEO Core base station is installed at eye level and provides an intuitive 7-inch display for enhanced interaction, making it easier than ever to register headsets, manage your store settings, and view battery and system health information. With just a few taps on the base station display, you'll access critical system information like network connectivity, headset status, speaker/mic status, and loop health.

Save Time with Quick and Easy Headset Pairing

Connect a headset to the base station quickly, hassle-free, and with no training needed. Follow the simple on-screen instructions, tap your headset to the blue ring on the base station when instructed, and your headset will register in just a few seconds. Headsets are ready to use almost instantly, saving valuable time. Plus, with unlimited pairing, you can connect as many headsets as needed to keep your operation running smoothly.
