

COMMUNICATION PLATFORM

ONE PLATFORM, THREE SOLUTIONS.

The NEXEO communication platform is now available in three product tiers, each uniquely created to address a specific market demand, making NEXEO the first ever configurable headset system ideal for any type of restaurant, regardless of size or layout. NEXEO is truly the total solution for restaurant communication that grows with our customers and makes it easy to upgrade as customer needs evolve.

NEXEO® | Core

Enables a modern implementation of the classic drive-thru experience with second-generation wideband HD audio to further improve sound quality for both employees and customers, as well as ease-of-use enhancements to improve the day-to-day crew experience.

NEXEO®

The total solution for restaurant communication. NEXEO connects all staff, either working the drive-thru or other stations, and helps them engage with unique features such as 1:1 and 1:Group communication. NEXEO also offers one-of-its-kind features such as voice commands and ZOOM Nitro® Timer integration to enable your restaurant to run more efficiently.

NEXEO® | Pro

Going beyond what is already offered in NEXEO, NEXEO Pro offers the greatest operational efficiency on the market by enabling seamless third-party integrations, including the latest voice AI technology and other store systems to provide crews with real-time actionable alerts when it matters most.
