**Settings & Adjustments**

**All-In-One Headset Lights Off:**
- Make certain the headset power is Off.
- Press and hold the **B button** while pressing and releasing the **Power button**.
  
  **Note:** "Lights Off" is temporary. Lights return when power is cycled.

**Belt Pack Sidetone Adjustment:**
- Press and hold the **A button** while you repeatedly press up (▲) to increase or press down (▼) to decrease audio levels.
Register Belt Pack or All-In-One Headset

- Make certain the Belt Pack or Headset is turned Off.
- Press **REG button** on base station.
  - STATUS display on the base station shows “o” for registration mode.
- On the Belt Pack and Headset, press and hold **ISO** while pressing **POWER** and then release all buttons.
  - The power lights blink red, then green and then turn off. One power light remains green.
  - The registration number will appear on the base station STATUS display.

**AUTO NULL Adjustment (only if using 2-wire interface)**

If echo is heard in wireless Belt Packs or All-In-One Headsets on A or B:

- Use pointed object (e.g. pen) to press and hold the A or B **AUTO NULL button** for 2 seconds.
  
  **CAUTION**: Before pressing an **AUTO NULL button**, be certain there are no open microphones on the wired system. Notify wired system users that a loud noise may occur in their headsets during the auto null adjustment.

The system may be out of operation for approximately 50 seconds during this adjustment.

Local Headset Communication

- **SEL button** selects communication with A, B or ISO.
  - A, B or ISO lights indicate selection.
- **TALK button**
  - Press and release quickly to “latch on” for open communication.
  - Press and hold while talking for momentary communication – release when finished.
- **VOLUME** control adjusts the audio level in local headset ear piece.
- **MIC LEVEL** control adjusts the audio level going out from local headset microphone.
