There are some new and exciting enhancements to the HME CLOUD!

## Group Restaurants into a Hierarchy

The HME CLOUD now makes it easier to manage restaurants in your CLOUD account by enabling you to group them and organize them into a hierarchy. You may now organize stores into tiered groups to match the structure of your organization for easier reporting and managing users.

The screenshot shows two side-by-side panels from the HME CLOUD interface. The top navigation bar includes "WELCOME", "ZOOM DASHBOARD", "REPORTS", "MY ACCOUNT", and "SETTINGS". Below this are tabs for "STORES", "USERS", and "ROLES".

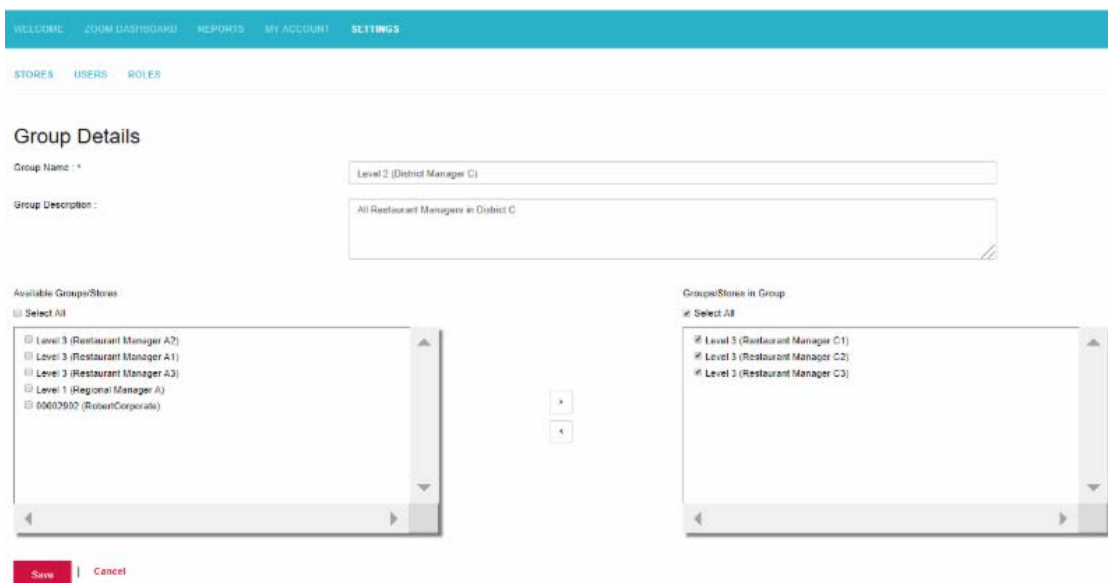

**Stores Panel:** Features two buttons: "Manage Leaderboard Groups" and "Manage Hierarchy" (indicated by a red arrow). Below is a table of corporate stores:

	Brand ↓	Store	Store Address
<a href="#">View/Edit Details</a>	KFC*	00002901	
<a href="#">View/Edit Details</a>	KFC	00002460	
<a href="#">View/Edit Details</a>	KFC*	00002904	

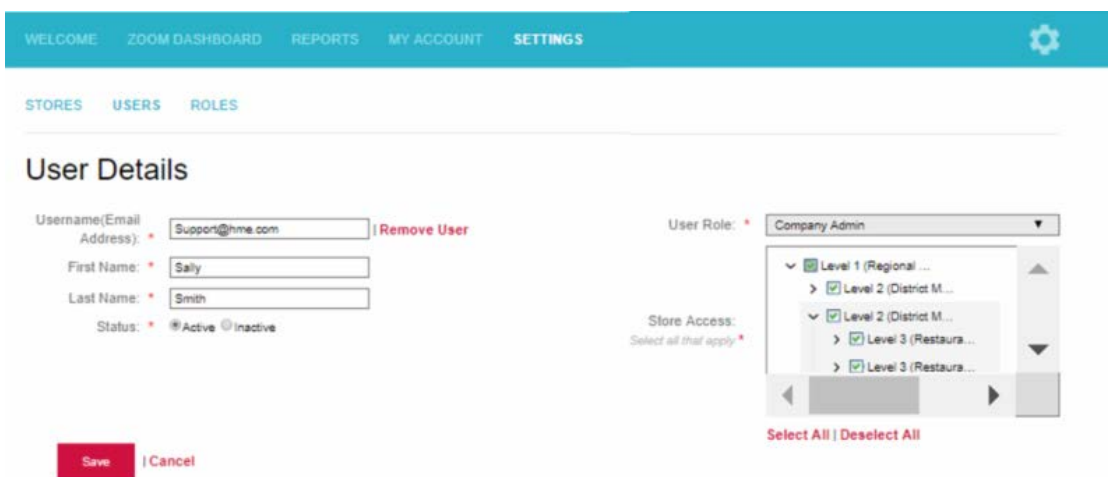

**Group Management Panel:** Features an "Add New Group" button (indicated by a red arrow). Below is a hierarchical tree structure:

- Level 1 (Regional Manager A)
  - Level 2 (District Manager A)
    - Level 2 (District Manager B)
      - Level 3 (Restaurant Manager B1)
        - Level 3 (Restaurant Manager B2)
          - Level 3 (Restaurant Manager B3)
            - 00002463 (Robert)
  - Level 2 (District Manager C)

You must be an Account Owner to create a Hierarchy. Create and name groups for your restaurants based on any criteria that you choose, like region or lane type. You may also create a group that belongs to another group in a hierarchy. For example, restaurants may be grouped into Districts and Districts can be grouped into Regions.

You may add or change User access to restaurants more easily by using groups. For example, Account Owners may configure their Managers' access to their individual restaurants by selecting a group of restaurants, rather than having to pick the individual restaurants from a list.

You may now select the restaurants that you want in your Summary Reports more easily by selecting the group that you created.
